## Product overview

UCS 2904B is a 4 channel LED driving and controlling constant current IC, with a built-in MCU digital interface, data latches and LED high voltage driving circuit. It features superior and reliable functions. Under the control of the external MCU, it performs independent grayscale control through data-cascading transfer for driving large outdoor color dot-matrix led panels.

Adopt S-drive technology and enhanced receiving technology. Extending the pull wire distance between two points more than 10m under 800K transmission sequence. Excellent product performance, reliable quality.

## Function Characteristic

1. Single line data transmission (Return to Zero Code);
2. Shaping transmit specific technology, Cascade number of lamps and lanterns is not restricted;
3. Cascading ability enhancement technology, Any 2 lanterns spacing can be up to 10 meters;
4. Data transfer rate of 800 k/s, images of not less than 512 points can be realized when the refresh rate of 25 frames per second.
5. RGBW output port PWM can be achieved 256 gray level each port adjustment. Port scanning frequency of 1.8 KHZ/S.
6. Built in 5V stabilvoltage, Port max withstand voltage up to 26V
7. 17mA constant current per channel. High precision of constant current, differences of current between channel is less than  $\pm 1.5\%$ . the differences of current between chip is less than  $\pm 3\%$ .
8. When power on, IC self-inspection then LED light connection on the pin B port. Lighting Blue color.
9. S-AI anti-interference patent technology for single line data transmission.
10. Industries standard design, stable and reliable.

## Application

1. Pixel lighting
2. LED flexible strip
2. Display

## PIN define

UCS2904B		
NO.	Symbol	Description
1	OUTR	Red PWM Output
2	OUTG	Green PWM Output
3	OUTB	Blue PWM Output
4	GND	Ground
5	DOUT	Data Input (800K)
6	DIN	Data Output (800K)
7	VDD	Power
8	OUTW	White PWM Output

## Absolute Maximum Ratings (Ta = 25 °C, Vss = 0 V)

Parameter	Symbol	Value	Unit
Logic supply voltage	V <sub>DD</sub>	+ 7.0	V
Output port limitation voltage	V <sub>OUT</sub>	28	V
Logic input voltage	V <sub>I</sub>	- 0.5 to V <sub>DD</sub> + 0.5	V
Operating temperature	T <sub>OPT</sub>	- 40 to + 85	°C
Storage temperature	T <sub>STG</sub>	- 55 to + 150	°C
antistatic	ESD	6 0 0 0	V
output rating	P <sub>d</sub>	4 0 0	mW

Data transfer rate	$F_{MAX}$	800	-	-	kbps	50 % duty cycle
Input capacitance	$C_i$	-	-	15	pF	-

## Constant current characteristic

UCS2904B constant current characteristic is excellent. Between channel, even between chip, the difference of current is tiny.

(1): the differences of current : Between channel is less than  $\pm 1.5\%$ ; the difference of current between chip is less than  $\pm 3\%$ .

(2): When the voltage of load change, UCS2904B output current is not affected, as shown in the figure1

(3): Below UCS2904B output port of the current Iout and add on the port voltage Vds curve relationship, the smaller the Iout current, the smaller in the condition of constant current need of Vds.
